computers & industrial engineering

Contents

Vol. 25, Nos 1–4, 1993

PROCEEDINGS OF THE 15th ANNUAL CONFERENCE ON COMPUTERS AND INDUSTRIAL ENGINEERING

OPTIMIZATION

Yozo Nakahara and **Mitsuo Gen** — 1 A method for solving linear programming problems with triangular fuzzy coefficients using new ranking index

Dong Shang Chang and **Raykin R. Tan** — 5 Confidence bounds of the Weibull failure rate

Masato Sasaki and **Mitsuo Gen** — 9 An extension of interactive method for solving multiple objective linear programming with fuzzy parameters

Steven H.-Y. Lai — 13 Fuzzy logic controller design for spacecraft proximity operations

Hyunchul Kim, Kenichi Ida and **Mitsuo Gen** — 17 A *de novo* approach for bicriteria 0–1 linear programming with interval coefficients under GUB structure

Laurence J. Moore, Jack C. Davis, Aubrey E. Harvey, John J. Imholz, Robert J. McIlwain and **Bernard W. Taylor III** — 21 Multicriteria models for analysis of the environmental restoration and waste management program

Swaminathan Murugabaskar and **Wilfred V. Huang** — 25 Simulation analysis with group screening

Rasaratnam Logendran and **Parthasarathi Ramakrishna** — 29 Effect of machining time in the duplication process of machine cells formation

Fernando Mata — 33 Common random numbers and multinomial selection

TQM

Sitki Gozlu — 37 Quality circle activities in the Turkish establishments

Mohammed Nadeem and **Tomas Velasco** — 41 Knowledge-based approach to quality control assurance using bar code identification systems

TRAINING AND EDUCATION

Jocelyn Drolet and **Ram Lakshmanan** — 45 Computers and industrial engineering courses: a winning combination

Chuen-lung Chen and **Stanley F. Bullington** 49 Development of a strategic research plan for an academic department through the use of quality function deployment

Azim Houshyar and **Victor Nuila** 53 Required steps for successful design and implementation of simulation

C. Ray Asfahl, Sandy Swayze, Joanne Lee and **Robert Safford** 57 An interactive computer training program for industry

Bala Ram, Eui Park and **Silvanus Udoka** 61 An interdisciplinary laboratory for manufacturing education

PRODUCTION OPERATIONS MANAGEMENT

Taqi N. Al-Faraj, Abdulaziz S. Alidi and **Jamal A. Al-Zayer** 65 Vendors selection via a spreadsheet analytical hierarchy process

Yasser Hosni and **Labiche Ferreira** 69 Justification of new technologies through the use of "cause and effect" analysis: case of tile replacement at Kennedy Space Center

Chao-Yen Wu and **Tongqian Jin** 73 Forecasting methods for industry and business

Farhad Tadayon and **Ming C. Liu** 77 Principal component analysis: a tool for assembly management

Phuong Loan Nguyen and **Lionel Dupont** 81 Production management of a steel manufacturing system: a hierarchical planning model

Chao-Yen Wu 85 Reliability analysis for a single-area generation system

Surendra M. Gupta and **Louis Brennan** 89 The performance of materials management in multi-level product structures with demand uncertainty and back-ordering

EXPERT SYSTEMS, ARTIFICIAL INTELLIGENCE

Kent E. Williams and **Timothy G. Kotnour** 93 An electronic performance support system for organizational learning

Mahendra Kadidal and **Bopaya Bidanda** 99 A castability expert system

Kevin J. Leonard 103 Detecting Credit Card Fraud Using Expert Systems

Lee C. Daugherty, Hamid R. Parsaei and **Sai S. Kolli** 107 Strategic justification of advanced automated technology systems using an expert system

Y. Y. Su, K. Srihari and **Jim Adriance**	111	A knowledge update mechanism for an adhesive advisor
Pamela McCauley Bell and **Adedeji B. Badiru**	115	Concept mapping as a knowledge acquisition tool in the development of a fuzzy rule-based expert system
Steven Hill Rogers and **Adedeji B. Badiru**	119	A fuzzy set theoretic framework for knowledge-based simulation
Y. Y. Su and **K. Srihari**	123	A knowledge based aircraft-gate assignment advisor
Eyler Coates and **T. Warren Liao**	127	Automatic reintegration of previously machined materials
David A. Ress and **Kenneth R. Currie**	131	Development of an expert system for scheduling work content in a job shop environment
Steven H.-Y. Lai	135	Engine system diagnosis using vibration data
		NETWORKING COMMUNICATION
Silvanus J. Udoka	139	Electronic data interchange (EDI) electronic graphics interchange (EGI) and bar codes: fundamental components of your world-class manufacturing enterprise
Jung Bok Jo, Yasuhiro Tsujimura, Mitsuo Gen and **Genji Yamazaki**	143	A delay model of queueing network system based on fuzzy sets theory
Shinkoh Okada and **Mitsuo Gen**	147	Order relation between intervals and its application to shortest path problem
Sam Hsu and **Mohammad Ilyas**	151	A simulation study of bursty data traffic with hybrid source smoothing in an ATM node
Kurapati Venkatesh and **Mohammad Ilyas**	155	Modeling, controlling, and simulation of local area networks for flexible manufacturing systems using Petri nets
Godfrey I. Archibong and **Mohammad Ilyas**	159	An efficient technique for integrating voice and data in wireless communication with a cellular structured environment
		SIMULATION
Kenneth R. Morrison, David W. Poock and **Charles W. White**	163	Forecasting the consumption of gasoline in the U.S.
Susan M. West, William W. Swart and **Muzaffar A. Shaikh**	167	A proposed testbed for evaluating adaptive routing algorithms
Celestine A. Ntuen	171	A new approach to modeling human response errors in synthetic flight simulation domain

Samir M. Benmakhlouf and **Suresh K. Khator** 175 Smart lifts: control design and performance evaluation

Aubrey E. Harvey and **Michael C. Kleder** 179 A metric for consensus—design and calibration

Amy Henninger 183 Reducing weapons systems' life cycle costs with simulation modeling

Thomas M. West, Angela N. Amundson and **Sabah U. Randhawa** 187 Evaluation of alternative materials handling systems

Emine Persentili and **Sema Alptekin** 191 Integration of simulation modeling and computer aided production management in computer integrated enterprise

Tarun Gupta and **Somchin Leelaket** 195 A simulation study comparing GT vs. job shop manufacturing systems

COMPUTER AID PROCESS PLANNING

Hoo-Gon Choi and **Chang Hyo Moon** 199 Performance comparison of two-dimensional clustering algorithms in group technology

T. W. Liao, E. R. Coates, F. Aghazadeh, L. Mann and **N. Guha** 203 Modification of CAPP systems for CAPP/scheduling integration

Sunil Dhage and **John M. Usher** 207 Computer-aided tool selection for turning and boring

Robert L. Williams and **Yen-Gi Lee** 211 Determination of minimum three-dimensional cutting-tool paths in the presence of barriers

SCHEDULING AND SEQUENCING

Richard A. Thelen and **Kenneth R. Morrison** 215 Customized job shop scheduling application development

Venkateswara S. Vempati, Chuen-Lung Chen and **Stanley F. Bullington** 219 An effective heuristic for flow shop problems with total flow time as criterion

Wade C. Driscoll 223 A microcomputer-based scheduling assist system

Young-Hoon Lee and **Sooyoung Kim** 227 Neural network applications for scheduling jobs on parallel machines

Stephane Dauzere-Peres and **Jean-Bernard Lasserre** 231 An iterative procedure for lot streaming in job-shop scheduling

Stephane Dauzere-Peres 235 The one-machine sequencing problem with dependent jobs

Yasuhiro Tsujimura, Seung Hun Park, In Seong Chang and **Mitsuo Gen**	239	An effective method for solving flow shop scheduling problems with fuzzy processing times
Gürsel A. Süer, Eduardo Báez and **Zbigniew Czajkiewicz**	243	Minimizing the number of tardy jobs in identical machine scheduling
Gürsel A. Süer and **Miguel Saiz**	247	Cell loading in cellular manufacturing systems
Gürsel A. Süer and **Rafael A. Lizardi**	251	Scheduling in an MRP environment
Narasimha R. Mannur and **Jyothi Babu Addagatla**	255	Heuristic algorithms for solving earliness–tardiness scheduling problem with machine vacations
Ming Liang	259	Part selection, machine loading, and machining speed selection in flexible manufacturing systems
Juichin Jiang and **Ming-ying Chen**	263	The influence of alternate process planning in job shop scheduling
Cihan Dagli and **Sinchai Sittisathanchai**	267	Genetic neuro-scheduler for job shop scheduling
		WORLD OF I.E.
Mordecai Avriel and **Michal Penn**	271	Exact and approximate solutions of the container ship stowage problem
John H. Manley	275	Information process flow analysis (IPFA) for re-engineering manufacturing systems
Tanvir Arfi and **Hamid M. Lankarani**	279	Development of logical deductive fault diagnostic technique for real time application
Chandra Kompalli and **Hamid M. Lankarani**	283	Automated path planning for face milling of N-sided convex polygonal surfaces using staircasing strategy
Marco Gagliardi and **Cosima Spera**	287	A model to manage a large number of transactions: a case study
Ahmed A. Moreb and **Abdullah Omer Bafail**	291	Dynamic data systems models for predicting the load demand
Abdullah Omer Bafail and **Ahmed A. Moreb**	295	Optimal allocation of students to different departments in an engineering college
Nael A. Aly and **Rhonda Mack**	299	TQM implementation in hospitals
Andrew E. Jackson, Robert R. Safford and **William W. Swart**	303	Critically indexing for job/task improvement at the Kennedy Space Center

DATABASE DEVELOPMENT

Cynthia M. Walton	307	Time standard and reject data collection system
Farah D. Shooshtarian, Dar-Jen Chang, Jian (John) Dong and **Hamid R. Parsaei**	309	Design and implementation of a relational data base for automated process planning
Bert Naquin and **Dia Ali**	313	Active database and its utilization in the object oriented environment
Vidya Sagar Ranganathan and **Dia Ali**	317	Distributed object management, integrating distributed information in heterogeneous environment

CONCURRENT ENGINEERING

Ganesh M. Krishnaswamy and **Ahmad K. Elshennawy**	321	Intelligent concurrent engineering environment
Jian (John) Dong, Hamid R. Parsaei and **Tim Gornet**	325	Manufacturing features extraction and recognition
Thomas M. West and **Sabah U. Randhawa**	329	Multicriteria evaluation of the design/build process
Thomas A. Shipley and **Robert L. Armacost**	333	Systematic approach in new product development
R. Bruce Taylor and **Thomas M. West**	337	A methodology for the evaluation of integrated manufacturing systems

DECISION SUPPORT

Antti J. Kanto and **Vesa Männistö**	341	Network-level pavement management system in Finland—an optimization tool for improved roadkeeping
Celestine A. Ntuen, Eui H. Park and **William Byrd**	345	A heuristic program for reliability and maintainability allocation in complex hierarchical systems
John H. Ristroph, Ranganathan Muralidharan, Naresh Miglani, Kym B. Arcuri and **Maurice Knight**	349	Pollution prevention decision support system
Hannu Kivijärvi and **Markku Tuominen**	353	A decision support system for evaluating intangible investments
Hamid R. Parsaei, Mickey R. Wilhelm and **Sai S. Kolli**	357	Application of outranking methods to economic and financial justification of CIM systems

Tanvir Arfi and **Behnam Bahr**	361	Development of decision support knowledge based system for tool wear diagnosis
George K. Hoepfner and **Fernando Mata**	365	A multi-criteria decision analysis methodology for selection of a preferred residence based on physical attributes
S. S. Kolli, P. S. Damodaran and **G. W. Evans**	369	Geographic information system based decision support systems for facility location, routing and scheduling

NEURAL NETWORK

Celestine A. Ntuen, E. H. Park, J. M. Deeb, W. Winchester and **E. Mansfield**	373	The development of flight simulation database using handling quality studies
Godwin Udo	377	Neural network performance on the bankruptcy classification problem
David B. Sieger and **Adedeji B. Badiru**	381	An artificial neural network case study—prediction versus classification in a manufacturing application
Serge Toure, Luis Rabelo and **Tomas Velasco**	385	Artificial neural networks for flexible manufacturing systems scheduling
Jun Wang	389	A neural network approach to multiple-objective cutting parameter optimization based on fuzzy preference information
Wonjang Baek	393	Pattern classification via linear programming
Tomas Velasco and **Mark R. Rowe**	397	Back propagation artificial neural networks for the analysis of quality control charts
Kamal S. Ali	401	Self learning for autonomous systems

HUMAN FACTORS AND ERGONOMICS

Jeffrey C. Woldstad and **Gregory B. Stewart**	405	A computer-based method for recording three-dimensional body postures
Bob White and **Robert Wygant**	409	Ergonomic analysis of lifting tasks using computerized cinematography
H. Greig Lindner, Faith T. Chandler and **Dennis W. Pate**	413	An examination of the human factors support of NASA's safety directorate on the space station processing facility (SSPF), Kennedy Space Center, Florida
Saeid Motavalli and **Faiz Ahmad**	419	Measurement of seating comfort

Robert M. Wygant, Bob E. White and **Doug Hunt** 423 Combining ergonomics and work measurement for job analysis

Yasuhiko Saito, Takuji Yamamoto, Saho Ayabe-Kanamura and **Toshinori Kobayashi** 427 Effects of favorite and unfavorable odor stimulus on ERP components

Toshinori Kobayashi, Yoshinobu Iguchi, Yasuhiko Saito, Sunao Uchida and **Takuji Yamamoto** 431 Effects of daytime activities on sleep qualities

QUALITY AND RELIABILITY

Chang Eun Kim, Young In and **Mitsuo Gen** 435 Replacement policy for a partially observable Markov decision process model using fuzzy data

Robert M. Remski and **Shimon Y. Nof** 439 Analytic and empirical assessment models of on-line inspection technologies

Ming C. Liu and **Lori Aldag** 445 Computerized continuous sampling plans with finite production

Noel Artiles-León and **Roberto Pérez-Matos** 449 Optimization of average-run-length properties of control charts using recurrent events

Nasser S. Fard and **Jason J. Kim** 453 Analysis of two stage sampling plan with imperfect inspection

Peng-Fei Wang and **Lih-Hsing Hsu** 457 Finding the most vital edge with respect to K-terminal reliability in series–parallel networks

George Abdul-Nour 461 On some factors affecting the just-in-time production system output variability: a simulation study using Taguchi techniques

Luis A. Quiroga and **Tomas Velasco** 465 Application of reliability concepts in automatic identification

Klaus Fischer 469 Performance-reliability-models and quality management

COMPUTER INTEGRATED MANUFACTURING

Hamid Seifoddini and **Manoocher Djassemi** 473 A dynamic part assignment procedure in machine cell formation

R. Meenakshi Sundaram and **Kiran Doshi** 477 Cellular manufacturing system design with alternative routing consideration

L. J. George, John W. Priest and **G. T. Stevens**	481	Proprinter design for manufacturability
Ali K. Kamrani, Hamid R. Parsaei and **Mahfooz A. Chaudhry**	487	A survey of design methods for manufacturing cells
Karl-Werner Hansmann	491	Integrated order release and scheduling for embedded flexible manufacturing systems
Munish Agarwal and **Ali K. Kamrani**	495	An automated coding and classification system with supporting database for effective design of integrated manufacturing systems
Ali K. Kamrani and **Hamid Parsaei**	499	Performance analysis of the cellular manufacturing systems: a decision support tool
Pranab Nayyar and **Suresh K. Khator**	503	Operational control of multi-load vehicles in an automated guided vehicle system
Arun S. Kashyap and **Suresh K. Khator**	507	Control rules for tool sharing in flexible manufacturing systems
Kevin Hooks, Luis Rabelo and **Tomas Velasco**	511	Enhancing computer aided inspection through the integration of quality control and computer aided design
Chell Roberts and **Terrence G. Beaumariage**	515	A specification technique for generating and simulating supervisory control
Ike C. Ehie and **Godwin J. Udo**	519	Reliability of information flow in a CIM system
R. Bruce Taylor	523	Development of a robust CIM laboratory environment using multi-criteria goal setting and evaluation

INFORMATION SYSTEMS

Jim I. Jones and **Kenneth R. Morrison**	527	Work flow and electronic document management
Jinoos Hosseini	533	Revisiting and expanding Taylorism business process redesign and information technology
Robert M. Cowdrick	537	Logistic planning and control systems (LPCS)—fundamentals and future directions
Ronald R. Mourant and **Sibel Tari**	541	Simulation concepts for information system
P. S. Damodaran, S. S. Kolli and **S. M. Alexander**	545	The investigation of new approaches to business data analysis
Vincent Bemmel and **Mohammad Ilyas**	549	A novel congestion control strategy in ATM networks

Kwok K. Choi and **Mohammad Ilyas** 553 Relationship between eraser node and traffic intensity in counter rotating slotted ring

OBJECT-ORIENTED DSS

John M. Usher 557 An object-oriented approach to product modeling for manufacturing systems

Joseph A. Fisher 561 Object oriented random number generators

Sabah U. Randhawa, Charles C. Brunner, James W. Funck and **Guangchao Zhang** 565 An object-oriented modeling framework for sawmill simulation

Tarun Gupta and **Rizvan Erol** 569 An integrated simulation model development environment for SLAM II Using Object-Oriented Paradigm

Joakim Waxlax 573 An object-oriented DSS for strategic management

KNOWLEDGE ENGINEERING

Marie E. Gomes and **Daniel E. Snyder** 577 Integrating user needs by computer-supported interpretation of concept maps

Ali K. Kamrani and **Kamran K. Kamrani** 581 Manufacturing enterprise integration using hierarchial control and distributed database

Steven H.-Y. Lai 585 KBDA—a knowledge based design system for assembly
